

## Remaking Participation Science, Environment and Emergent Publics

---

By -

Routledge. Hardcover. Book Condition: New. Hardcover. 216 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. The focus of this book is public participation in the governance of science and technology, particularly pertaining to environment and sustainability issues. The past three decades have seen a dramatic rise in diverse forms of participation throughout western democracies, but this book represents the first major attempt to consolidate the research field of critical public engagement studies and practice, working at the interface between science and technology studies (STS), geography, environmental science, and political and democratic theory. Bringing together leading scholars writing on science and society today, the book moves beyond the focus that has dominated the public participation field to date around developing methods and democratic engagement. In doing so, the authors shift the spotlight to participation as an object of study in itself, paying close attention to its social construction, performance, expertise, power and discourse. The book addresses the following key questions: What does critical public engagement mean in terms of research and practice? What is the nature of public participation expertise and how do technologies of participation get produced, mobilised, and with what effects? How is public engagement framed, controlled and governed and how...

### Reviews

*Merely no words to explain. I really could comprehend everything out of this published e book. I found out this publication from my dad and i suggested this publication to learn.*

-- **Prof. Margarita Ledner PhD**

*This written pdf is fantastic. It normally is not going to expense a lot of. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Gilbert Stroman**
