

The Molecular Biology of Cancer: A Bridge from Bench to Bedside (Hardback)

Filesize: 8.84 MB

Reviews

It is an incredible ebook that we actually have ever study. This is certainly for all those who statte that there had not been a worthy of looking at. I am just pleased to inform you that this is the very best publication i have got go through during my individual daily life and can be he best ebook for possibly.

(Clarabelle Marvin)

THE MOLECULAR BIOLOGY OF CANCER: A BRIDGE FROM BENCH TO BEDSIDE (HARDBACK)

John Wiley Sons Inc, United States, 2013. Hardback. Book Condition: New. 2nd Revised edition. 282 x 224 mm. Language: English . Brand New Book. The Molecular Biology of Cancer, Stella Pelengaris Michael Khan This capturing, comprehensive text, extensively revised and updated for its second edition, provides a detailed overview of the molecular mechanisms underpinning the development of cancer and its treatment. Bench to Bedside : A key strength of this book that sets it apart from general cancer biology references is the interweaving of all aspects of cancer biology from the causes, development and diagnosis through to the treatment and care of cancer patients essential for providing a broader view of cancer and its impact. The highly readable presentation of a complex field, written by an international panel of researchers, specialists and practitioners, would provide an excellent text for graduate and undergraduate courses in the biology of cancer, medical students and qualified practitioners in the field preparing for higher exams, and for researchers and teachers in the field. For the teaching of cancer biology, special features have been included to facilitate this use: bullet points at the beginning of each chapter explaining key concepts and controversial areas; each chapter builds on concepts learned in previous chapters, with a list of key outstanding questions remaining in the field, suggestions for further reading, and questions for student review. All chapters contain text boxes that provide additional and relevant information. Key highlights are listed below: * An overview of the cancer cell and important new concepts. * Selected human cancers: lung, breast, colorectal, prostate, renal, skin, cervix, and hematological malignancies. * Key cellular processes in cancer biology including (a) traditionally important areas such as cell cycle control, growth regulation, oncogenes and tumour suppressors apoptosis, as well as (b) more highly topical areas of...
