Brand New Book ***** Print on Demand *****.Excerpt from Extra-Uterine Pregnancy: A Discussion; With an Appendix Reviewing Mr. Lawson Tait s Ectopic Gestation and Pelvic Hematocele Mr. President and Fellows: In beginning the discussion upon so important a subject as that of extra-uterine pregnancy, I am not unmindful of the necessarily limited time each one has at his disposal, and, therefore, have attempted to condense, so far as possible, that portion of the subject - its pathology - which I have been invited to present. Indeed, much of interest has been already published, both of a theoretical as well as of a practical nature, but it is to be regretted that in all this wealth of literature reference to results from broad studies in comparative anatomy is but scanty. What a field would this topic place at the disposal of him who might care to unravel these hidden mysteries, in seeking out the analogy between man and the lower animals! In tracing out pathological conditions we should of necessity refer to histology and physiology, for without these scientific aids to our study we lose sight of the finer shades of beginning morbid processes as differentiated from absolutely normal ones. From deductions like these then, we should begin our study of the pathology of ectopic gestation, by comprehending the physiological functions of the organs most intimately involved. We should, therefore, know primarily the functions of the Fallopian tubes and ovaries; and, lastly, we are to deduce from such knowledge the physiological processes by which the ovum becomes fecundated, as well as the site of its fecundation. The pathological processes following may then, I think, be more distinctly and definitely traced. About the Publisher Forgotten Books...
