

Physics Essays for Advanced Pupils (Paperback)

Filesize: 5.62 MB

Reviews

The publication is fantastic and great. It can be rally exciting throgh reading period of time. I am just very happy to inform you that this is the greatest publication i actually have read in my very own daily life and could be he very best ebook for at any time.

(Prof. Alvis Wuckert)

AUTHORHOUSE, United States, 2005. Paperback. Book Condition: New. 280 x 210 mm. Language: English . Brand New Book ***** Print on Demand *****.The present book is primarily aimed at final year mathematics and physics honors students and at mature researchers and practicing engineers with interests in theoretical physics and astronomy. It is also intended as a reference source for the later books. The major topics covered in this presentation include the following: Relativistic effects of space-time and mass-velocity. We believe the primary difference between the absoluteness of Newtonian space and time, with their attendant independence, and the relativistic notions of space and time, is the mediating nature of the electromagnetic field described by Maxwell s equations. This intermediary nature of electromagnetism. is best illustrated by the light cone in 4 dimensions, or its 3 dimensional analogue, the light sphere. The physics is formulated within the framework of a flat 4 dimensional space-time in the absence of matter. The wave particle duality necessitated by the dictums of quantum mechanics, require the photons be smeared on the surface of the spherical wave front. This facilitates the transition from the geometry of Einstein to the 2 dimensional world of particles, whose trajectories reside on the surface of an ever expanding sphere. When matter resides in the interior, there would be a corresponding deflationary effect, slowing down the expansion. For an observer on the surface of the light sphere, the PRESENT corresponds to time = 0, while the interior PAST corresponds to time and $gt; 0$, with the FUTURE represented by time and $lt; 0$. The light sphere expands outwards at the speed of light. These philosophical ruminations have direct applicability to some of the fundamental questions of the early universe. Inparticular, the light sphere provides a bridge between the Cosmological Principle and a...
