This book has been in the making since my days at Ahmadu Bello University Zaria, in the Faculty of Education. I had always wanted to produce a book that is small and easy enough to read and yet succinct to meet the needs of the undergraduate or graduate students in Education who are preparing for their sessional exams! The book has undergone considerable revisions to meet that target goal. In part these revisions have been necessitated by the geometric increase in our knowledge of general psychology, as well as science, in the last two decades. This is to say nothing of the psychology of learning. The increase in our knowledge- base has further been doubled by the new technology of the Internet. Some have even argued that, the availability of the Internet has rendered the publishing of such books redundant. However, I'm convinced that books would continue to play a central role in our lives for the foreseeable future. I had wanted to include most of the material that psychologists subsume under the heading of learning. I have tried to include important topics as well as new developments in the field that I believe an undergraduate student will find useful. Also included are cultural Implications, which are applications of the general topic in a classroom setting in the relevant culture. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
