O'Reilly Media. Paperback. Book Condition: New. Paperback. 188 pages. Dimensions: 9.1in. x 7.0in. x 0.5in. If you know basic high-school math, you can quickly learn and apply the core concepts of computer science with this concise, hands-on book. Led by a team of experts, you'll quickly understand the difference between computer science and computer programming, and you'll learn how algorithms help you solve computing problems. Each chapter builds on material introduced earlier in the book, so you can master one core building block before moving on to the next. You'll explore fundamental topics such as loops, arrays, objects, and classes, using the easy-to-learn Ruby programming language. Then you'll put everything together in the last chapter by programming a simple game of tic-tac-toe. Learn how to write algorithms to solve real-world problems. Understand the basics of computer architecture. Examine the basic tools of a programming language. Explore sequential, conditional, and loop programming structures. Understand how the array data structure organizes storage. Use searching techniques and comparison-based sorting algorithms. Learn about objects, including how to build your own. Discover how objects can be created from other objects. Manipulate files and use their data in your software. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
